

concrete is believed to be an antipathetic thing compared to the creations of the nature but if it is used in the correct way we can change many cults about the usage of concrete

the main aims of this project are combination with the nature & create emotions

these units can be used as supporters of a metro station [above] or an underwater research facility [right] they can also be used as elements in an urban space organization as defining a space or just to give people the feeling of an artificial habitat
