

This block is a neat, flexible piece of concrete. Use it inside, outdoor or anywhere! It can easily be moved by two persons such as; seating, stairs, walls, pots (upside down), side tables, space creators, dividers, water containers and much, much more. Mass producing will make it affordable. They come in different colors off course. The relief on top makes the product stable when stacking them. If necessary just "glue" them together. Cast against a metal-mould gives it a smooth surface. So join in and build on!

EASY-PIECE
