

# Concrete Light

The unique combination of concrete and light inspired me to design this lampshade. This design is made of partially transparent concrete. By turning on the light, little spots of light appear in the concrete. The shape of the lampshade descends from traditional lampshades, but the interesting combination material and size, give you a complete innovative design. *Diameter 90 cm, high 80 cm, Weight 35/40 kilo*

Concrete - *Light*

Concrete - *Transparency*

Concrete - *Mould*

Concrete - *Subtle*
